

## Acknowledgments

We would like to extend our gratitude and recognition to all those who contributed to organization of SIS 2024 symposium:

- BITS Pilani K K Birla Goa Campus for hosting the symposium
- The co-hosts IISER Pune, ICT Mumbai, Society for Industrial Chemistry, Indian Society for Surface Science and Technology and the Oil Technologist Society of India
- The leadership team of BITS Pilani, IISER Pune and ICT Mumbai
- Our sponsors
  - Galaxy Surfactants
  - Kruss
  - KV Fire Chemicals (India)
  - Unilever
  - Fine Organics
- Dr. Kash Mittal, General Chairman
- The Scientific Program Committee
- All Chairpersons in facilitating the technical sessions
- Faculty, staff and PhD students of BITS Pilani K K Birla Goa Campus who helped manage the local logistics of SIS 2024
- All the participants for their high-quality abstracts and participation in this symposium.

## **General Chairman**

- **Dr. Kash Mittal**

## **Scientific Program Committee**

- **Prof. Sunil Bhagwat**  
Director IISER Pune Scientific Program Committee Chairman
- **Prof. Jayesh Bellare Professor**  
Department of Chemical Engineering, IIT Bombay
- **Prof. Jaideep Chatterjee**  
Professor, Department of Chemical Engineering, BITS Pilani, Hyderabad Campus
- **Prof. Amiya Panda**  
Professor, Department of Chemistry, Vidyasagar University
- **Dr. Hrishikesh Mirgal**  
General Manager - Applications, Croda International
- **Prof. Kallol K. Ghosh**  
Professor of Chemistry, Pt. Ravishankar Shukla University, Raipur
- **Dr. R Venkataraghavan**  
Platform Leader, Unilever
- **Dr. Parag Naik**  
Lead Scientist, ITC Limited, Bengaluru

## **Local Organizing Committee**

- **Prof. Srinivas Krishnaswamy**  
Local Organizing Committee Chairman
- **Department of Chemical Engineering**  
BITS Pilani K K Birla Goa campus

## **International Advisory Committee**

- Prof. Edgar Acosta (Canada)
- Prof. Krassimir D. Danov (Bulgaria)
- Prof. Michael Gradzielski (Germany)
- Prof. Toyoko Imae (Japan)
- Prof. Mihalj Posa (Serbia)
- Prof. Ramon G. Rubio (Spain)
- Prof. Artur Valente (Portugal)
- Prof. Konrad Terpilowski (Poland)
- Prof. Junbai Li (China)

# Table of Contents

<b>Program Schedule</b>	1
<b>KM Awardee Lecture: Hydrotropes: weakly SURFace ACTIVE agENTS but strongly active for solubilisation</b>	17
<b>Technical Session I</b>	18
The impact of viscosity on dynamic surface tension measurements. A guideline to analyze surfactant solutions of various viscosities	19
Self-assembly and interactions of bacterial lipids	20
The influence of copolymeric additives and hydrophobicity dynamics on tailored self-association in P123 micelles	21
Polyol-based deep eutectic solvents (DESs): A new platform for modulating surfactant self-assembly in pure and aqueous environments	22
<b>Technical Session II</b>	23
Unravelling the anomalous nature of the aqueous nanochannels in self-assembled lyotropic liquid crystalline systems	24
Pickering emulsion polymerization using amphiphilic chitin nanofibers as stabilizer to fabricate nanochitin-based composite particles	25
Aqueous self-assembly in a zwitterionic-anionic surfactant system: Physicochemical insights	26
Tactile friction under boundary lubrication: Reduction in fingertip friction using surfactants	27
<b>Plenary Lecture 1: Surfactants - Synthesis, combinations, reaction media and measurements</b>	28
<b>Technical Session III</b>	29
Ultra-stable pickering liquid crystal-in-water emulsions decorated with thermoresponsive microgels. An optical sensor for amphiphilic analytes	30
Physicochemical studies on amino acid based metallosurfactants in combination with phospholipid	31
Synthesis and surface activity of short chain carboxamide based cationic fluorocarbon and hydrocarbon cationic surfactants as alternatives to PFOA/PFOS	32

Synthesis of short chain thioether containing non-ionic fluorosurfactant and evaluation of its surface activity	33
<b>Technical Session IV</b>	34
De-stabilization of oil-droplets adhering to practical solid surfaces with surfactant solutions	35
Directed chemical evolution of protein-based surfactants	36
Surfing the Green Wave: Bio Surfactants as Key Players in Environmental Restoration	37
Remediation of Pyrene contaminated red soil by nZVI (Nano Zero-valent Iron) and SiO <sub>2</sub> (Silica) nanoparticles stabilized Tween 80 (TW80) Surfactant foam	38
Human serum albumin conjugated gold nanoparticles non-covalent interactions explored with antioxidants ferulic acid and sinapic acid	39
<b>Plenary Lecture 2: Polymerized Ionic Liquid Surfactants for Advanced Materials</b>	40
<b>Technical Session V</b>	41
From Self-Assembly to Drug Delivery: Understanding and Engineering Protein Fibrils by pluronics monomers and micelles	42
<b>Technical Session VI</b>	43
Surfactant crystals at gas/liquid interfaces for foam stability	44
Unravelling Thermodynamics signatures accompanying binding of protein to lipid nanoparticles: A calorimetric and spectroscopic analysis	45
<b>Technical Session VII</b>	46
Design and development of novel Micellar catalytic systems for Organophosphate toxicants	47
Probing Surfactant Interactions with Different Interfaces: Case Studies with Nanochitin and Fibrous Nonwoven Fabrics	48
Insight into Surfactant-assisted Enhanced Oil Recovery: Spectroscopic Approach for Understanding Oil Solubilization for Designing Effective Injection Fluid	49
Outstanding stability and enhanced activity of Cytochrome-c induced by surfactant in aqueous mixtures of deep eutectic solvent	50

<b>Technical Session VIII</b>	51
Lessons learned from modelling surfactants at multiple scales: reverse micelles, emulsions and adsorption	52
Interfacial phenomena in leaching of critical metals from spent lithium-ion battery cathode	53
How Zwitterionic Surfactants Affects the Photophysics of Styryl Dye in Triblock Copolymer Assembly with Different PEO and PPO Composition?	54
Phototriggered Drug delivery system of Di-block copolymeric and Spiropyran micelles via NSET mechanism for targeted and real-time drug delivery	55
<b>Plenary Lecture 3: Internally Networked Nanogels</b>	56
<b>Technical Session IX</b>	57
Effect of non-ionic surfactants on the wetting property of cationic surfactant	58
Biosurfactant production using waste engine oil degrading bacteria pseudomonas aeruginosa gi KP163922: A promising solution for dye removal using nano-adsorbents	59
<b>Technical Session X</b>	60
Dynamic surface properties of protein aggregates	61
Innovation of sustainable surfactants: BASF Perspective	62
<b>Technical Session XI</b>	63
Sustainable surfactants: The role for feedstocks, technologies and new chemistries	64
Baroplastics: A Deep-Sea-Inspired Path to Sustainable Polymers	65
Surface, interfacial and thermodynamic aspects of the biosurfactant-salt systems	66
Exploring the influence of surfactant collector bath characteristics on the morphology of electrospun polystyrene magnetite composite fibers	67
<b>Technical Session XII</b>	68
The revised Hydrophilic-Lipophilic Difference for Ionic surfactants (HLD <sub>bi</sub> ): A bridge between formulation practice and surfactant science	69

Particle Attributes and Stability of Interfacial Systems in Relation to Pickering Foams	70
Enhancing gas hydrate kinetics using surfactants for desalination applications	71
Flotation separation of ABS/PS flakes mixture from used refrigeration equipment	72
<b>Plenary Lecture 4: Amphiphile Self-Assembly Driving Force, Structure Formation, and Applications</b>	73
<b>Technical Session XIII</b>	74
Leveraging surfactant and particle & powder technologies for enhanced performance in industrial applications	75
Novel polymeric aqueous dispersant – Atlox 4917	76
Hybrid hydrogel sorbents based on natural polysaccharides for extraction of dyes from aqueous solutions	77
<b>Technical Session XIV</b>	78
Characterizations of vesicular structures fabricated from a Pseudotriple-Chained di ion pair amphiphile	79
Photo-induced fast and reversible morphological changes in micelles formed by amphiphilic Lophine dimers and their evaluation by in-situ SANS measurement	80
Challenges in the design and optimization of the surfactant - based delivery systems	81
<b>POSTER SESSION</b>	82
Effect of gemini surfactant alkyl chain length on self-assembly properties of POE-based nonionic surfactants micellar behavior: An in-depth of scattering study	85
Determining the mechanisms of the micellization as well as the interactions between molecules within a combination of surfactants mixture	86
Co-solvent and Co-surfactant effect of some alkanols and alkanediols on Micellization of a cationic gemini surfactant in aqueous solutions	87
Formation of ethanolamine-mediated surfactant-free microemulsions using hydrophobic deep eutectic solvents	88
Aggregates in deep eutectic solvents (DESs): Hydrophilic DES-in-hydrophobic DES novel nonaqueous microemulsions	89

The “Normalized HLD”: The Ultimate Version of the Hydrophilic-Lipophilic-Deviation Equation for Characterizing and Formulating Surfactant/Oil/Water Systems	90
Nano Zero-valent Iron (nZVI) stabilized APG (Alkyl Polyglycoside) Surfactant Foam for the remediation of Acephate in Alluvial soil	91
Waste plastic as a feedstock for producing surfactants	92
Tunable catalytic activity of mixed micelle for the oxidation of benzyl alcohol in aqueous media	93
How Polyoxometalates Promote the Aggregation of Cyanine Dyes in the Aqueous Solution of Non-Ionic Copolymers of Varying Hydrophilic–Lipophilic Balance?	94
Light-triggered emulsion formation using a protonated merocyanine as a surfactant	95
Effect of Oil Type on the Viscoelastic Behavior of Surfactant Film Formed at Oil/Water Interface	96
Role of surfactants on PLA/HA microspheres size and implications for azithromycin release	97
Isolation, Screening and Construction of a Microbial Consortium from Formation Water and its suitability for MEOR	98
Exploring the Solubilization Behavior of Gelucire® 48/16 and Tetronics® 1304: A Molecular Perspective	99
Understanding the Influence of Organic Additives on Phase Behavior and Microstructure: A Comparative Study of Soluplus and Solutol® HS15 Micellar Systems	100
Understanding the Interaction Between Ionic Liquids and Amphiphilic Star Block Copolymers	101
The effect of ethoxylated alcohols on the sedimentation rate of calcium carbonate. Potential for use in flotation separation of plastics	102
Enhancing Emulsion Stability for Oil Recovery: The Synergistic Effects of Surfactants, Nanoparticles, and Polymers	103
Saponins in Pithecellobium dulce: Structural Diversity and Surface-Active Potential	104

<b>Technical Session XV</b>	105
Structural effect of surfactants on the compaction of ct-DNA in the presence of silica nanoparticles: Presenting highly efficient gene delivery vectors	106
Structure-Property-Energetics relationships in drug partitioning and release employing colloidal self-assemblies: mechanistic insights	107
